Gentlemen:

The Commission has filed the enclosed Notice of Proposed Issuance of Amendments to Facility Operating Licenses with the Office of the Federal Register for publication. The proposed amendments would revise provisions in the Technical Specifications relating to fuel residence time, control rod insertion limits, and limiting safety system settings in accordance with your request of February 10, 1975. The revisions will allow operation of Turkey Point Nuclear Generating Unit 4, following refueling, at 2250 psia until the extended fuel residence time limit is reached.

Sincerely,

Original Signed

George Lear, Chief  
Operating Reactors Branch #3  
Division of Reactor Licensing

UNITED STATES NUCLEAR REGULATORY COMMISSION

DOCKETS NOS. 50-250 AND 50-251

FLORIDA POWER AND LIGHT COMPANY

NOTICE OF PROPOSED ISSUANCE OF AMENDMENTS  
TO FACILITY OPERATING LICENSES

The Nuclear Regulatory Commission (the Commission) is considering issuance of amendments to Facility Operating Licenses Nos. DPR-31 and DPR-41 issued to Florida Power and Light Company (the licensee), for operation of the Turkey Point Nuclear Generating Units 3 and 4, located in Dade County, Florida.

The amendments would revise the Technical Specifications in accordance with the licensee's application dated February 10, 1975. The revisions would modify those provisions in the Technical Specifications relating to fuel residence time, control rod insertion limits, and limiting safety system settings. The revisions will allow operation of Turkey Point Nuclear Generating Unit 4, following refueling, at 2250 psia until the extended fuel residence time is reached. The operating limits for Unit 3 set forth in its Technical Specifications will remain unchanged although the Technical Specifications will be modified to reflect the revisions to the Unit 4 Technical Specifications.

Prior to issuance of the proposed license amendments, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.

By 4/29/75 the licensee may file a request for a hearing and any person whose interest may be affected by this proceeding may file a request for a hearing in the form of a petition for leave to intervene with respect to the issuance of the amendments to the subject facility operating licenses. Petitions for leave to intervene must be filed under oath or affirmation in accordance with the provisions of Section 2.714 of 10 CFR Part 2 of the Commission's regulations. A petition for leave to intervene must set forth the interest of the petitioner in the proceeding, how that interest may be affected by the results of the proceeding, and the petitioner's contentions with respect to the proposed licensing action. Such petitions must be filed in accordance with the provisions of this FEDERAL REGISTER notice and Section 2.714, and must be filed with the Secretary of the Commission, U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Docketing and Service Section, by the above date. A copy of the petition and/or request for a hearing should be sent to the Executive Legal Director, U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, and to Jack R. Newman, Esquire, Lowenstein, Newman, Reis and Axelrad, 1025 Connecticut Avenue, N. W., Washington, D. C. 20006, the attorney for the licensee.

A petition for leave to intervene must be accompanied by a supporting affidavit which identifies the specific aspect or aspects of the proceeding as to which intervention is desired and specifies with particularity the facts on which the petitioner relies as to both his interest and his contentions with regard to each aspect on which intervention is requested.

Petitions stating contentions relating only to matters outside the Commission's jurisdiction will be denied.

All petitions will be acted upon by the Commission or licensing board, designated by the Commission or by the Chairman of the Atomic Safety and Licensing Board Panel. Timely petitions will be considered to determine whether a hearing should be noticed or another appropriate order issued regarding the disposition of the petitions.

In the event that a hearing is held and a person is permitted to intervene, he becomes a party to the proceeding and has a right to participate fully in the conduct of the hearing. For example, he may present evidence and examine and cross-examine witnesses.

For further details with respect to this action, see the application for amendments dated February 10, 1975, which is available for public inspection at the Commission's Public Document Room, 1717 H Street, N. W., Washington, D. C. and at the Lily Lawrence Bow Public Library, 212 N. W. First Avenue, Homestead, Florida. The license amendments and the Safety Evaluation, when issued, may be inspected at the above locations and a copy may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Director, Division of Reactor Licensing.

Dated at Bethesda, Maryland, this 11th day of March, 1975.

FOR THE NUCLEAR REGULATORY COMMISSION

  
George Lear, Chief  
Operating Reactors Branch #3  
Division of Reactor Licensing
