Dear Dr. Uhrig:

The Commission has issued the enclosed Amendment No. 94 to Facility Operating License No. DPR-31 and Amendment No. 88 to Facility Operating License No. DPR-41 for the Turkey Point Plant Unit Nos. 3 and 4, respectively. The amendments consist of changes to the Technical Specifications in response to your application transmitted by letter dated February 16, 1982, as supplemented by letters dated August 12, and December 30, 1982.

These amendments update the offsite management organization to reflect the current corporate structure. By letter dated November 16, 1982, we transmitted our initial Safety Evaluation. We indicated that we could not determine if the Company Nuclear Review Board (CNRB) members meet the qualification requirements identified in the Safety Evaluation. The supplemental information provided in your submittal of December 30, 1982, has resolved our concerns. The enclosed Safety Evaluation replaces the initial Safety Evaluation provided on November 16, 1982.

Copies of the Safety Evaluation and the Notice of Issuance are also enclosed.

Sincerely,

ORIGINAL SIGNED

Daniel G. McDonald, Jr., Project Manager
Operating Reactors Branch No. 1
Division of Licensing

DOCKET NO. 50-250

TURKEY POINT PLANT UNIT NO. 3

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 94
License No. DPR-31

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The application for amendment by Florida Power and Light Company (the licensee) dated February 16, 1982, as supplemented by letters dated August 12, and December 30, 1982, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.

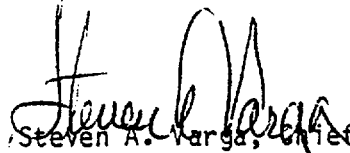

2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment, and paragraph 3.B of Facility Operating License No. DPR-31 is hereby amended to read as follows:

(B) Technical Specifications

The Technical Specifications contained in Appendices A and B, as revised through Amendment No. 94, are hereby incorporated in the license. The licensee shall operate the facility in accordance with the Technical Specifications.

3. This license amendment is effective as of the date of its issuance.

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 88
License No. DPR-41

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The application for amendment by Florida Power and Light Company (the licensee) dated February 16, 1982, as supplemented by letters dated August 12, and December 30, 1982, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.

2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment, and paragraph 3.B of Facility Operating License No. DPR-41 is hereby amended to read as follows:

(B) Technical Specifications

The Technical Specifications contained in Appendices A and B, as revised through Amendment No. 88, are hereby incorporated in the license. The licensee shall operate the facility in accordance with the Technical Specifications.

3. This license amendment is effective as of the date of its issuance.

AND AMENDMENT NO. 88 TO FACILITY OPERATING LICENSE NO. DPR-41
FLORIDA POWER AND LIGHT COMPANY
TURKEY POINT PLANT UNIT NOS. 3 AND 4
DOCKET NOS. 50-250 AND 50-251

I. INTRODUCTION

By letter to the NRC dated August 12, 1982, as supplemented by letter dated December 30, 1982, Florida Power and Light Company (FPL or the licensee) has proposed changes to the Technical Specifications for Turkey Point Units 3 and 4 to reflect changes to its offsite management organization. FPL states that this August 12, 1982, submittal supersedes a February 16, 1982, change request in its entirety.

II. EVALUATION

A. Organization and Title Changes

The licensee proposes to modify Figure 6.2-1, "Offsite Organization for Facility Management and Technical Support" to show that a Nuclear Energy Department (NED) has been formed to manage the nuclear activities that were previously managed by the Power Resources Department. The new NED is headed by a Vice President who reports directly to the FPL Executive Vice President. Reporting to the new Vice President-NED is a Manager-NED, a position that was previously titled Manager-Power Resources-Nuclear and that previously reported to the Vice President-Power Resources. The Site Manager and the Manager-Nuclear Engineering Services (title changed from Manager-Power Resources Nuclear Services) and a new position titled Assistant Manager NED report to the Manager-NED.

The licensee also proposed to modify Figure 6.2-2 to reflect the title changes in the offsite organization. The titles in the two boxes currently listed as Power Resources Staff will change to Nuclear Energy Services Staff.

We conclude that the organization structure changes as discussed above does not diminish FPL's ability to safely operate the Turkey Point Units 3 & 4 and the proposed modifications to Figures 6.2-1 and 6.2-2 to reflect these changes are acceptable.

B. Nuclear Review Board Membership Changes

The licensee also proposes to modify the composition of the Company Nuclear Review Board (CNRB) as described in current Technical Specification Section 6.5.2.2. The licensee proposes to replace the four member titles currently listed as: Vice President-Power Resources; Manager of Power Resources-Nuclear; Power Plant Engineering Manager; and Power Plant Engineering Supervisor with five new member titles: Vice President, Nuclear Energy; Manager, Nuclear Energy; Manager, Nuclear Fuel; Power Plant Engineering Principal Engineer; and Power Plant Engineering Senior Project Manager.

We currently require that each member, including the chairman and alternate members, of review groups that perform the independent review functions described in Section 4 of ANSI N18.7 Standard and in Section 6.5.2.1 of the Turkey Point Technical Specifications, as a minimum, have a bachelors degree in engineering of related science or its equivalent and five years of professional experience in his/her specialty.

The CNRB is a company wide board serving both Turkey Point and St. Lucie plants.

The corporate position titles of designated CNRB members are such that the incumbents would be expected to at least meet the minimum requirements as specified in the ANSI standard. Further, the qualifications of the present incumbents have recently been reviewed and approved as part of the St. Lucie Unit 2 operating license review.

We conclude that the board members meet the minimum qualifications specified above.

III. SUMMARY

We have determined that the update of the off site management organization reflects the current corporate structure and the proposed changes to Section 6.5.2.2 are acceptable.

IV. ENVIRONMENTAL CONSIDERATION

We have determined that the amendments do not authorize a change in effluent types or total amounts nor an increase in power level and will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendments involve an action which is insignificant from the standpoint of environmental impact and, pursuant to 10 CFR §51.5(d)(4), that an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of these amendments.

V CONCLUSION

We have concluded, based on the considerations discussed above, that: (1) because the amendments do not involve a significant increase in the probability or consequences of an accident previously evaluated, do not create the possibility of an accident of a type different from any evaluated previously, and do not involve a significant reduction in a margin of safety, the amendments do not involve a significant hazards consideration, (2) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and (3) such activities will be conducted in compliance with the Commission's regulations and the issuance of the amendments will not be inimical to the common defense and security or to the health and safety of the public.

Date: March 18, 1983

UNITED STATES NUCLEAR REGULATORY COMMISSIONDOCKET NOS. 50-250 AND 50-251FLORIDA POWER AND LIGHT COMPANYNOTICE OF ISSUANCE OF AMENDMENT TO FACILITY
OPERATING LICENSES

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 94 to Facility Operating License No. DPR-31, and Amendment No. 88 to Facility Operating License No. DPR-41 issued to Florida Power and Light Company (the licensee), which revised Technical Specifications for operation of Turkey Point Plant, Unit Nos. 3 and 4 (the facilities) located in Dade County, Florida. The amendments are effective as of the date of issuance.

The amendments update the offsite management organization to reflect the current corporate structure.

The application for the amendments complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendments. Prior public notice of these amendments was not required since the amendments do not involve a significant hazards consideration.

- 2 -

The Commission has determined that the issuance of these amendments will not result in any significant environmental impact and that pursuant to 10 CFR §51.5(d)(4) an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with issuance of these amendments.

For further details with respect to this action, see (1) the application for amendments dated February 16, 1982, as supplemented by letters dated August 12, and December 30, 1982, (2) Amendment Nos. 94 and 88 to License Nos. DPR-31 and DPR-41, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C. and at the Environmental and Urban Affairs Library, Florida International University, Miami, Florida 33199. A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D.C. 20555, Attention: Director, Division of Licensing.

Dated at Bethesda, Maryland, this 18th day of March, 1983.
