FLORIDA POWER AND LIGHT COMPANY

TURKEY POINT UNIT NOS. 3 AND 4

DOCKET NOS. 50-250 AND 50-251

1.0 INTRODUCTION

By letter dated November 22, 1995, Florida Power and Light (FPL or the licensee) proposed a change to the Technical Specifications (TS) for Turkey Point Units 3 and 4. The proposed changes would revise the Index of the TS by deleting reference to the Bases pages.

2.0 EVALUATION

This amendment does not modify existing TS requirements or safety limits. This change is administrative in nature and is consistent with the requirements of 10 CFR 50.36(a), which states that the Bases shall not become part of the TS. The Bases information will be consolidated into a controlled plant document. Future changes to the Bases information will be evaluated per 10 CFR 50.59. Since the Bases index is not required to be a part of the TS per 10 CFR 50.36(a), the staff concludes that the proposed changes are acceptable. Control of the TS bases changes by plant procedure, including evaluation in accordance with 10 CFR 50.59, provides a means of control acceptable to the staff.

3.0 STATE CONSULTATION

Based upon the written notice of the proposed amendments, the Florida State official had no comments.

4.0 ENVIRONMENTAL CONSIDERATION

Pursuant to 10 CFR 51.21, 51.32, and 51.35, an environmental assessment and finding of no significant impact was published in the Federal Register on February 12, 1996 (61 FR 5413). In this finding, the Commission determined that issuance of these amendments would not have a significant effect on the quality of the human environment.

5.0 CONCLUSION

The Commission has concluded, based on the considerations discussed above, that (1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, (2) such activities will be conducted in compliance with the Commission's regulations, and (3) the issuance of the amendment will not be inimical to the common defense and security or to the health and safety of the public.
