NOZZLES (TAC NOS. MB2624 and MB2625)

On November 20, 2001, Indiana Michigan Power Company (I&M), the licensee for Donald C. Cook Nuclear Plant (CNP) Units 1 and 2, met with the Nuclear Regulatory Commission (NRC) staff to present I&M's justification that CNP Unit 2 was safe to operate past December 31, 2001. The result of that meeting was an acknowledgement that it was safe to operate CNP Unit 2 until January 19, 2002. I&M will shutdown CNP Unit 2 no later than January 19, 2002, in accordance with the currently planned refueling outage schedule, and perform the vessel head penetration (VHP) inspection during that outage. I&M plans to continue open communication with the NRC staff regarding the scope of the VHP inspection.

The commitment made in this letter is contained in Attachment 1. Should you have any questions, please contact Mr. Ronald W. Gaston, Manager of Regulatory Affairs, at (616) 697-5020.

Sincerely,
