Correction to
Amendment 48
to DPR-41

Dear Mr. Uhrig:

On March 21, 1980, the Commission issued Amendment Nos. 56 and 48 to Facility Operating License Nos. DPR-31 and DPR-41 for Turkey Point Units 3 and 4, respectively. The amendments revised the reactor coolant pressure-temperature limits to account for neutron irradiation induced increases in reactor vessel metal nil ductility temperature.

Technical Specifications page 3.1-2 did not correctly reference the applicable figures 3.1-1a through 3.1-1d (Unit 3) and 3.1-2a through 3.1-2d (Unit 4). In order to provide the correct reference to the figures, enclosed is the corrected page 3.1-2 to be inserted in Appendix A of Facility Operating License Nos. DPR-31 and DPR-41.

Please accept our apologies for any inconvenience this error may have caused.

Sincerely,

A handwritten signature in cursive script, reading "Daniel G. McDonald".

Daniel G. McDonald, Project Manager
Operating Reactors Branch No. 1
Division of Licensing
