

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

November 21, 1984

Docket Nos. 50-250
and 50-251

Mr. J. W. Williams, Jr., Vice President
Nuclear Energy Department
Florida Power and Light Company
Post Office Box 14000
Juno Beach, Florida 33408

Dear Mr. Williams:

The Commission has issued the enclosed Amendment No. 111 to Facility Operating License No. DPR-31 and Amendment No. 105 to Facility Operating License No. DPR-41 for the Turkey Point Plant Units Nos. 3 and 4, respectively. The amendments consist of changes to the Technical Specifications in response to your application transmitted by letter dated March 14, 1983, as supplemented.

These amendments allow spent fuel pool storage capacity expansion from 621 to 1404 spaces for each spent fuel pool. The expansion is to be achieved by reracking each spent fuel pool with two discrete regions within each pool. Region I is for storage of new fuel with an enrichment equal to or less than 4.5% U-235. Region II is for storage of irradiate fuel meeting the burnup requirements defined in the Technical Specifications.

The request for these amendments was individually noticed on June 7, 1984 (49 FR 23715) followed by a monthly notice on July 7, 1984 (49 FR 29925). Comments, request for a hearing and petition for leave to intervene were initiated on July 9, 1984, by the Center for Nuclear Responsibility and Ms. Joette Lorion. The comments and concerns relevant to these amendments are addressed in the enclosed Safety Evaluation. The Safety Evaluation also includes a final determination of No Significant Hazards Consideration.

Under NRC regulations, the Commission may issue and make an amendment immediately effective, notwithstanding a request for a hearing, in advance of holding the hearing where, as here, it has determined that the amendment involves no significant hazards consideration. Such issuance is also consistent with Section 132 of the Nuclear Waste Policy Act of 1982 which requires the Commission to encourage and expedite the effective use of available storage at civilian reactor sites.

Copies of the Safety Evaluation and Notice of Issuance and Final Determination of No Significant Hazards Consideration are enclosed.

The Environmental Assessment related to this action was transmitted to you on November 14, 1984. The Notice of Issuance of Environmental Assessment

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

FLORIDA POWER AND LIGHT COMPANY

DOCKET NO. 50-251

TURKEY POINT PLANT UNIT NO. 4

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 105
License No. DPR-41

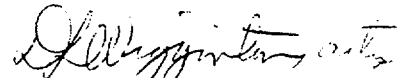

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The application for amendment by Florida Power and Light Company (the licensee) dated March 14, 1984 as supplemented complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.
2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment, and paragraph 3.B of Facility Operating License No. DPR-41 is hereby amended to read as follows:

(B) Technical Specifications

The Technical Specifications contained in Appendix A and B, as revised through Amendment No. 105, are hereby incorporated in the license. The licensee shall operate the facility in accordance with the Technical Specifications.

3. This license amendment is effective immediately and shall be implemented within 60 days of issuance.

FOR THE NUCLEAR REGULATORY COMMISSION

Steven A. Varga, Chief
Operating Reactors Branch #1
Division of Licensing
