Docket No. 50-338

Virginia Electric & Power Company
ATTN: Mr. W. L. Proffitt
Senior Vice President - Power
P. O. Box 26666
Richmond, Virginia 23261

Gentlemen:

SUBJECT: ISSUANCE OF AMENDMENT NO. 7 TO FACILITY OPERATING LICENSE
NO. NPF-4 - NORTH ANNA POWER STATION, UNIT NO. 1

The Nuclear Regulatory Commission (the Commission) has issued the enclosed Amendment No. 7 to Facility Operating License NPF-4.

This amendment rewords condition 2.D.(3)j of Amendment No. 3 to Facility Operating License NPF-4 by redesignating Barton transmitters 386/752 and 393 as Barton 764 and 763, respectively and deleting the use of the Foxboro EILGM (MCA/RRW) transmitter, and by extending the time which the results of testing the Barton transmitters must be provided to the NRC. The time has been extended from July 1, 1978 to October 1, 1978.

A copy of the Federal Register Notice concerning issuance of Amendment No. 7 and the related Safety Evaluation supporting Amendment No. 7 to License No. NPF-4 are enclosed.

Sincerely,

/S/

Olan D. Parr, Chief
Light Water Reactors Branch No. 3
Division of Project Management

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

VIRGINIA ELECTRIC AND POWER COMPANY

DOCKET NO. 50-338

NORTH ANNA POWER STATION, UNIT NO. 1

FACILITY OPERATING LICENSE

License No. NPF-4
Amendment No. 7

1. The Nuclear Regulatory Commission (the Commission) having found that:
 - A. The application for amendment by Virginia Electric and Power Company (the licensee), dated May 5, 1978 and June 7, 1978, comply with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the license, as amended, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.

2. Accordingly, paragraph 2.D.(3)j of the license is amended to read:

2.D.(3)j The Virginia Electric and Power Company shall provide for staff review the results of proper sequential qualification testing performed for (1) Barton 386/752 (now designated Barton 764), and (2) Barton 393 (now designated Barton 763) transmitters used in safety related circuits inside containment. Test conditions must include sequential radiation exposure, seismic testing and exposure to environmental conditions expected following a postulated steamline break and/or loss-of-coolant accident whichever is most limiting. The results of this testing shall be provided prior to October 1, 1978.

3. This amended license is effective as of the date of issuance.

UNITED STATES NUCLEAR REGULATORY COMMISSION

DOCKET NO. 50-338

VIRGINIA ELECTRIC AND POWER COMPANY

NOTICE OF ISSUANCE OF AMENDMENT TO FACILITY OPERATING LICENSE

The U. S. Nuclear Regulatory Commission (the Commission) has issued Amendment No. 7 to the Facility Operating License No. NPF-4, issued to Virginia Electric and Power Company, which rewords condition 2.D.(3)j contained in Facility Operating License NPF-4 Amendment No. 3. Amendment No. 7 is effective as of its date of issuance.

The amendment redesignates testing transmitters Barton 386/752 and Barton 393 to Barton 764 and Barton 763, respectively and deletes the use of the Foxboro EllGM (MCA/RRW) transmitter. The amendment also extends the date from (July 1, 1978 to October 1, 1978) which the results of the testing shall be provided to the Commission.

The application for the amendment complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations. The Commission has made appropriate findings as required by the Act and the Commission's rules and regulations in 10 CFR Chapter I, which are set forth in the license amendment. Prior public notice of this amendment was not required since the amendment does not involve a significant hazards consideration.

OFFICE ➤						
SURNAME ➤						
DATE ➤						

The Commission has determined that the amendment does not authorize a change in effluent types or total amounts nor an increase in power level and will not result in any significant environmental impact. Having made this determination, it has further been concluded that the amendment involves an action which is insignificant from the standpoint of environmental impact and, pursuant to 10 CFR Section 51.5(d)(4), that an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of this amendment.

For further details with respect to this action, see (1) Virginia Electric and Power Company letters, dated May 5, 1978, and June 7, 1978, (2) Amendment No. 7 to License No. NPF-4, and (3) the Commission's related Safety Evaluation. All of these items are available for public inspection at the Commission's Public Document Room, 1717 H Street, N. W., Washington, D. C. 20555 and at the Board of Supervisor's Office, Louisa County Courthouse, Louisa, Virginia 23093 and at the Alderman Library, Manuscripts Department, University of Virginia, Charlottesville, Virginia 22901. A copy of items (2) and (3) may be obtained upon request addressed to the U. S. Nuclear Regulatory Commission, Washington, D. C. 20555, Attention: Director, Division of Project Management.

Dated at Bethesda, Maryland this 3rd day of July 1978.
