

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

August 28, 1990

Docket Nos. 50-250
and 50-251

Mr. J. H. Goldberg
Executive Vice President
Florida Power and Light Company
P.O. Box 14000
Juno Beach, Florida 33408-0420

Posted
Amdt. 132 to DPR-41
(See collection letter of 9-14-90)

Dear Mr. Goldberg:

SUBJECT: TURKEY POINT UNITS 3 AND 4 - ISSUANCE OF AMENDMENTS RE: REPLACEMENT OF CURRENT TECHNICAL SPECIFICATIONS WITH REVISED TECHNICAL SPECIFICATIONS (TAC NOS. 63038 and 63039, 55915 and 55916, 55384 and 55385, 71864 and 71865)

The Commission has issued the enclosed Amendment No. 137 to Facility Operating License No. DPR-31 and Amendment No. 132 to Facility Operating License No. DPR-41 for the Turkey Point Plant, Units Nos. 3 and 4, respectively. The amendments consist of changes to the Technical Specifications in response to your application transmitted by letter dated June 5, 1989, as supplemented July 12, 1989, November 3, 1989, February 13, 1990, May 1, 1990, June 21, 1990 and July 20, 1990.

These amendments replace the entire current custom Technical Specifications with a set of revised Technical Specifications (RTS) which are based on the standard Technical Specifications for Westinghouse-designed plants. The RTS include added surveillances, action statements, and an improved user-friendly format, as well as other technical improvements which have been developed as a result of many years of industry operating experience and analyses since the initial TS were licensed for Turkey Point. The RTS impose many additional requirements and actions for surveillance, testing, and maintenance of equipment, and taken as a whole, are believed to represent a significant safety improvement for the operation of Turkey Point units 3 and 4.

The RTS issued with this amendment also serve to close out, for Turkey Point units 3 and 4, a number of generic technical issues which have been of concern to the NRC staff at nuclear plants in the U.S. These include the following:

1. Generic letter 84-15 (TS to reduce cold fast test-starts of diesel generators, TAC Nos. 55915 and 55916).
2. Generic letter 85-09 (TS for testing of shunt trip reliability, Salem ATWS Item 4.3, TAC Nos. 55384 and 55385).
3. Generic letter 87-09 (Applicability of Limiting Conditions for Operation, TAC Nos. 71864 and 71865).
4. Letter dated 11-28-78, Schwencer (NRC) to Uhrig (FPL) (TS for containment purge).

Mr. J. H. Goldberg

August 28, 1990

By this letter, we are closing TAC Nos. 63038 and 63039, 55915 and 55916, 55384 and 55385, and 71864 and 71865.

A copy of the Safety Evaluation is also enclosed. The Notice of Issuance will be included in the Commission's biweekly Federal Register notice.

Sincerely,

A handwritten signature in black ink, appearing to read "G E Edison".

Gordon E. Edison, Sr. Project Manager
Project Directorate II-2
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation

UNITED STATES
NUCLEAR REGULATORY COMMISSION
WASHINGTON, D. C. 20555

FLORIDA POWER AND LIGHT COMPANY

DOCKET NO. 50-251

TURKEY POINT PLANT UNIT NO. 4

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 132
License No. DPR-41

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The application for amendment by Florida Power and Light Company (the licensee) dated June 5, 1989, as supplemented July 12, 1989, November 3, 1989, February 13, 1990, May 1, 1990, June 21, 1990 and July 20, 1990, complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.

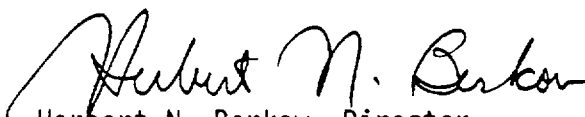

2. Accordingly, the license is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment, and paragraph 3.B of Facility Operating License No. DPR-41 is hereby amended to read as follows:

(B) Technical Specifications and Environmental Protection Plan

The Technical Specifications contained in Appendix A, as revised through Amendment No. 132, are hereby incorporated in the license. The Environmental Protection Plan contained in Appendix B is hereby incorporated into the license. The licensee shall operate the facility in accordance with the Technical Specifications and the Environmental Protection Plan.

3. This license amendment is effective as of the date of issuance. This license amendment shall be implemented prior to entering mode 6 for restart following a complete defueling of the reactor, or within 12 months, whichever occurs first.

FOR THE NUCLEAR REGULATORY COMMISSION

Herbert N. Berkow, Director
Project Directorate II-2
Division of Reactor Projects - I/II
Office of Nuclear Reactor Regulation

Attachment:
Changes to the Technical
Specifications

Date of Issuance: August 28, 1990
