The Commission has issued the enclosed Amendment Nos. 51 and 35 to Facility Operating License No. NPF-4 and No. NPF-7 for the North Anna Power Station, Units No. 1 and No. 2 (NA-1&2). The amendments revise the Technical Specifications (TS) in response to your application dated October 7, 1983, as supplemented December 27, 1983, and in our conversations with you regarding this matter. The amendments are effective as of the date of issuance.

The amendments revise the TS to reflect the addition and installation of new fire protection systems at NA-1&2. The newly installed fire protection systems are based on the requirements of the NRC safety evaluation for the NA-1&2 Fire Protection Program dated February 1979. The listing of these systems in the NA-1&2 TS will provide the required specificity for limiting conditions of operability and surveillance requirements.

A copy of the Safety Evaluation is enclosed. The notice of issuance will be included in the Commission's next monthly Federal Register notice.

Sincerely,

Original signed by:

Leon B. Engle, Project Manager
Operating Reactors Branch #3
Division of Licensing

Enclosures:

1. Amendment No. 51 to NPF-4
2. Amendment No. 35 to NPF-7
3. Safety Evaluation
