COMMENTS:

I approve amendment of the export license to increase the amount of HEU authorized for export under license # XSNM03171. My approval is based, in part, on the August 8, 2000, AECL submittal, which states that:

To avoid the accumulation of any excess inventory of HEU for the NRU, AECL and Transnuclear will initially ship no more than 5.0 kilograms of the additional total of 10 kilograms of HEU that is requested by this application for an amendment. Before shipping the final 5.0 kilograms authorized by this amendment, AECL and Transnuclear will notify the NRC Office of International Programs at least 60 days in advance of the proposed shipping date. If AECL needs the final 5.0 kilograms to produce targets for the NRU, as it currently anticipates, its notice to the NRC will set forth current information concerning the operational status of the NRU, the MAPLE Reactors and the NPF as well as other information that may be relevant to AECL's receipt of this material.
