Subject: Fee rule concurrence

Connie,

NRR's concurrence was just delivered to me. They concurred with comment--they want to add a statement at the end of page 6 (response to comment A.1) to the effect that suggestions related to improving efficiencies in the Reactor Oversight Process are being considered and staff's evaluation of the initial ROP implementation is being provided as a SECY paper.

As soon as I have EDO concurrence, I plan to give NRR's comment to Jesse when I give him the rule for signature.
