Mr. John Pfeiffer Office of Management and Budget New Executive Office Building 725 17th Street, N.W., Room 8025 Washington, DC 20503

Dear Mr. Pfeiffer:

The Omnibus Budget Reconciliation Act of 1990, as amended, requires that the NRC recover approximately 98 percent of its FY 2001 budget authority, less the appropriation from the Nuclear Waste Fund, by assessing license and annual fees. The NRC is required to recover approximately \$453.3 million in FY 2001.

In order to comply with the law, the Commission is amending its fee regulations in 10 CFR Parts 170 and 171. The final amendments to 10 CFR Part 170 will revise the professional hourly rates and "flat" licensing fees to reflect the costs of providing NRC licensing services to applicants and licensees.

The final amendments to 10 CFR Part 171 will establish the amount of the FY 2001 annual fees to be assessed to reactor licensees, fuel cycle licensees, transportation certificate holders, and materials licensees to recover costs not recovered through 10 CFR Part 170 fees. The FY 2001 annual fees will decrease for most of the categories of licensees, including operating power reactors. The annual fee decreases are primarily due to the reduction in the NRC's fee recovery requirement from 100 percent in FY 2000 to 98 percent in FY 2001, reduced budgeted costs for some classes of licensees, and increased costs recovered through 10 CFR Part 170 fees. However, the annual fees will increase for some licensees due primarily to increased budgeted costs for those classes.

Those NRC licensees that can qualify as a small entity under NRC's size standards will continue to be eligible to pay reduced annual fees.

Enclosed is a copy of the final which is being transmitted to the Federal Register for publication. The final rule will become effective 60 days after publication.

Sincerely,

original signed by Jesse L. Funches
