

IP2 Telecon - Licensee (pre pub mtg)

① drips out of tubes from wet & cold legs when filled to 1st VSP.
They think it was condensation

R2C5 top of U-lead.

② Crack is segmented 2"-3" long. Max opening is 3/8".
Segments about 3/4"

③ Will use bobbin & t-point for this area of this tube.

④ Opinion is AWSCC

⑤ R2C67 had similar indication plugged in 50-2/4 in '97.

⑥ Can't see R2C5 crack in 1997 data.
