Docket No. 50-335

Florida Power & Light Company  
ATTN: Dr. Robert E. Uhrig  
Vice President  
Nuclear and General Engineering  
P. O. Box 3100  
Miami, Florida 33101

Gentlemen:

In accordance with Facility Operating License No. DPR-67, you were required to implement a modified security plan and complete the three items listed in paragraph B of Enclosure 1 to the license, to the satisfaction of the Commission, prior to exceeding five percent of rated power at the St. Lucie Plant Unit No. 1. The license also states that you shall not proceed beyond certain specified operating conditions without prior authorization from the Commission.

Our Office of Inspection and Enforcement has verified that you have satisfactorily completed items B.1 and B.2 of Enclosure 1 referenced above. The intent of the condition regarding the modified security plan and of item B.3 has been satisfied by issuance of Amendment No. 5 to License No. DPR-67 as discussed in our safety evaluation enclosed with Amendment No. 5. You are therefore authorized to exceed five percent of rated power and operate in accordance with the conditions of the license, as amended, including the conditions of paragraphs C through K of Enclosure 1 to the license.

The safety evaluation and Amendment No. 5 are being transmitted as a separate action.

Sincerely,

Original signed by:

*Karl R. Goller*

Karl R. Goller, Assistant Director  
for Operating Reactors  
Division of Operating Reactors
