Florida Power & Light Company  
 ATTN: Dr. Robert E. Uhrig  
 Vice President  
 Nuclear and General Engineering  
 P. O. Box 3100  
 Miami, Florida 33101

Gentlemen:

In accordance with Facility Operating License No. DPR-67, you were required to complete the six items listed in paragraph A of Enclosure 1 to the license, to the satisfaction of the Commission, prior to achieving initial criticality at the St. Lucie Plant Unit 1. The license also states that you shall not proceed beyond certain specified operating conditions without prior authorization from the Commission.

Our Office of Inspection and Enforcement has verified that you have satisfactorily completed items A.1, A.2, A.4, A.5 and A.6 of Enclosure 1 referenced above. The intent of item A.3 has been satisfied by issuance of Amendment No. 4 to License No. DPR-67 and by the completion of alternate tests as discussed in the NRC Staff safety evaluation enclosed with Amendment No. 4. You are therefore authorized to proceed with initial criticality and operation in accordance with the conditions of the license, as amended, including the conditions of paragraphs B through J of Enclosure 1 to the license.

The safety evaluation and Amendment No. 4 are being transmitted as a separate action.

Sincerely,  
*Original signed by*  
*George Lear for*  
 Karl R. Goller, Assistant Director  
 for Operating Reactors  
 Division of Operating Reactors
