Dear Mr. Williams:

The Commission has issued the enclosed Amendment No. 67 to Facility Operating License No. DPR-67 for the St. Lucie Plant, Unit No. 1. This amendment consists of changes to the Technical Specifications in response to your application dated January 10, 1984.

The amendment changes the Technical Specifications to delete the radiological technical specifications in Appendix B (Appendix B, Part 1).

A copy of the related Safety Evaluation is also enclosed. The notice of issuance will be included in the Commission's next monthly Federal Register notice.

Sincerely,

Original signed by:

Donald E. Sells, Project Manager
Operating Reactors Branch #3
Division of Licensing

Dear Mr. Williams:

The Commission has issued the enclosed Amendment No. 67 to Facility Operating License No. DPR-67 for the St. Lucie Plant, Unit No. 1. This amendment consists of changes to the Technical Specifications in response to your application dated January 10, 1984.

The amendment changes the Technical Specifications to delete the radiological technical specifications in Appendix B (Appendix B, Part 1).

As a result of the staff's review of this application it was noted that the description and location of environmental samples was recorded more accurately and in more detail in the Appendix B, Part 1 technical specifications than in the approved St. Lucie Plant, Offsite Dose Calculation Manual (ODCM). Therefore, the staff recommends that the ODCM be revised such that 1) information in the Radiological Environmental Surveillance Table and Figure of Appendix E of the ODCM be upgraded to make it comparable to that of the Appendix B, Part 1 Table 3.2-1 and Figures 3.2-1 and 3.2-2. In particular, distances should be recorded to within 0.1 mile and a large scale map similar to the insert of Fig. 3.2-2 should be provided.

Take out by separate letter delete

A copy of the related Safety Evaluation is also enclosed. The notice of issuance will be included in the Commission's next monthly Federal Register notice.

Sincerely,

Original signed by:

Donald E. Sells, Project Manager
Operating Reactors Branch #3

DOCKET NO. 50-335

ST. LUCIE PLANT UNIT NO. 1

AMENDMENT TO FACILITY OPERATING LICENSE

Amendment No. 67
License No. DPR-67

1. The Nuclear Regulatory Commission (the Commission) has found that:
 - A. The application for amendment by Florida Power & Light Company, (the licensee) dated January 10, 1984 complies with the standards and requirements of the Atomic Energy Act of 1954, as amended (the Act) and the Commission's rules and regulations set forth in 10 CFR Chapter I;
 - B. The facility will operate in conformity with the application, the provisions of the Act, and the rules and regulations of the Commission;
 - C. There is reasonable assurance (i) that the activities authorized by this amendment can be conducted without endangering the health and safety of the public, and (ii) that such activities will be conducted in compliance with the Commission's regulations;
 - D. The issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public; and
 - E. The issuance of this amendment is in accordance with 10 CFR Part 51 of the Commission's regulations and all applicable requirements have been satisfied.

2. Accordingly, Facility Operating License No. DPR-67 is amended by changes to the Technical Specifications as indicated in the attachment to this license amendment, and by amending paragraph 2.C.(2) to read as follows:

(2) Technical Specifications

The Technical Specifications contained in Appendices A and B, as revised through Amendment No. 67, are hereby incorporated in the license. The licensee shall operate the facility in accordance with the Technical Specifications.

3. This license amendment is effective as of the date of its issuance.

SUPPORTING AMENDMENT NO. 67

TO FACILITY OPERATING LICENSE NO. DPR-67

FLORIDA POWER AND LIGHT COMPANY

ST. LUCIE PLANT, UNIT NO. 1

DOCKET NO. 50-335

Background

By letter dated January 10, 1984 the Florida Power and Light Company submitted a proposed change to the Technical Specifications for St. Lucie Plant, Unit No. 1. The proposed change is to delete Appendix B, Part 1 "Radiological Environmental Technical Specifications."

Discussion

On August 18, 1983 the Nuclear Regulatory Commission issued Amendment 59 to DPR-67 for St. Lucie Plant, Unit No. 1. Amendment 59 consisted of the Radiological Effluent Technical Specifications to meet the requirements of Section V of Appendix I of 10 CFR Part 50. The purpose of the amended technical specifications is to keep releases of radioactive materials to unrestricted areas during normal operations, including expected operational occurrences, as low as is reasonably achievable. Amendment 59 includes or supersedes all of the radiological technical specifications found in Appendix B, Part 1.

Based on the above discussion, the staff finds the licensee's proposed change to the technical specifications to be acceptable.

Environmental Consideration

We have determined that the amendment does not authorize a change in effluent types or total amounts nor an increase in power level and will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendment involves an action which is insignificant from the standpoint of environmental impact and, pursuant to 10 CFR §51.5(d)(4), that an environmental impact statement or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendment.

PDR

Conclusion

We have concluded, based on the considerations discussed above, that:
(1) there is reasonable assurance that the health and safety of the public will not be endangered by operation in the proposed manner, and
(2) such activities will be conducted in compliance with the Commission's regulations and the issuance of the amendment will not be inimical to the common defense and security or to the health and safety of the public.
