SEE REPROD TECH SPEC CHANGES

Dear Mr. Williams:

The Commission has issued the enclosed Amendment Nos. 69 and 13 to Facility Operating License Nos. DPR-67 and NPF-16 for the St. Lucie Plant, Unit Nos. 1 and 2. These amendments consist of changes to the Technical Specifications in response to your application dated May 15, 1984 (St. Lucie 1) and May 21, 1984 (St. Lucie 2) as amended by your letters dated May 23 and August 26, 1985.

These amendments consist of changes to the Technical Specifications to incorporate the provisions of 10 CFR 50.72 and 50.73 as defined in Generic Letter 83-43 and changes to the "Definition" and "Administrative Controls" sections to make the St. Lucie 1 and 2 Technical Specifications similar. Your request to delete Surveillance Requirement 4.8.1.1.3 from the St. Lucie 2 Technical Specifications is denied for the reasons given in the Safety Evaluation. This completes the staff's review under TACs 55046, 55064, 55742 and 55743.

A copy of the related Safety Evaluation is also enclosed. The notice of issuance will be included in the Commission's next bi-weekly Federal Register notice.

Sincerely,

Donald E. Sells, Project Manager
Operating Reactors Directorate #8
Division of Licensing
