Attention: Andy Kugler

Dear Mr. Kugler:

I am writing to express my full support for Dominion Resource's application to renew the license of the North Anna Power Station. North Anna has a history of safe and efficient electricity production and is important to Virginia's economy.

North Anna Power Station is one of the largest employers in the rural portion of my district. The 850 employees who work at the North Anna station are dedicated workers who are proud to provide safe and reliable electricity to approximately 17 % of Dominion Resources' customers in Virginia.

Many of these employees routinely volunteer their time and resources to help make their communities better places in which to live. The employee volunteer program facilitates the donation of tens of thousands of volunteer hours to projects that directly benefit the communities in which employees work and live. Financial support for civic and charitable endeavors are provided as well.

The North Anna Power Station has a strong and well-organized emergency security plan to assure the health and safety of its employees and the public. These programs, which function with the support and participation of state and local authorities, are tested periodically and are continually improved and updated.

The North Anna Power Station stands firmly behind its impressive environmental record. Radiological monitoring programs have indicated that operations at North Anna have had virtually no environmental impact. Plant and marine life in Lake Anna are at healthy levels, and Lake Anna continues to be a major recreational area and one of Virginia's outstanding freshwater fishing spots.

Again, I want to reiterate my strong support for the North Anna Power Station. They are, and will continue to be, a safe and valued employer in my district.

With kind regards, I am

Sincerely,

Eric Cantor
Member of Congress
