

December 31, 2001

MEMORANDUM TO: Charles L. Miller, Deputy Director
Licensing and Inspection Directorate
Spent Fuel Project Office
Office of Nuclear Material Safety
and Safeguards

FROM: Stephen C. O'Connor, Project Manager
Licensing Section
Spent Fuel Project Office
Office of Nuclear Material Safety
and Safeguards

SUBJECT: SUMMARY OF DECEMBER 4, 2001, MEETING WITH NUCLEAR
MANAGEMENT COMPANY

On December 4, 2001, U.S. Nuclear Regulatory Commission (NRC) staff met with representatives of Nuclear Management Company, LLC (NMC). This meeting was noticed on November 16, 2001. The purpose of the meeting was to discuss the NMC Spent Fuel Organization and the spent fuel status and cask loading plans for three NMC sites: Duane Arnold Energy Center, Point Beach Nuclear Plant, and Palisades Nuclear Plant. NMC stated that it was currently implementing the general licensing provisions of 10 CFR Part 72 at the Point Beach and Palisades plants for dry spent fuel storage and also planned to load casks at Duane Arnold under the general licensing provisions.

The licensee discussed its program to share resources between the sites for certain functions common to the dry storage program, such as nuclear oversight, training, and welding activities. NMC stated that it planned to use the NUHOMS storage system at all three plants. The licensee stated that Palisades had eighteen VSC-24 systems loaded and Point Beach had twelve VSC-24s loaded. NMC also stated that it planned to load four additional VSC-24s at Point Beach before switching to the NUHOMS design. The licensee told NRC staff that no additional VSC-24s were planned for loading at Palisades. NMC plans to begin loading NUHOMS casks at Duane Arnold in 2003.

The attendance list is included as an attachment. During this meeting, no regulatory actions or decisions were made or requested.

Docket Nos.: 72-5, -7, 32,
