Dear Mr. White:

The Commission has issued the enclosed Amendments Nos. 132, 128, and 103 to Facility Operating Licenses Nos. DPR-33, DPR-52 and DPR-68 for the Browns Ferry Nuclear Plant, Units 1, 2 and 3. These amendments are in response to your application dated September 30, 1986 (TVA BFNP TS 221).

The amendments change the Technical Specifications to add requirements for Radiological Effluent Technical Specifications (RETS) which comply with Section V of Appendix I to 10 CFR Part 50.

Submitted along with the RETS was the Radiological Effluent Manual (REM) which the staff has also found acceptable. The REM is associated with the RETS and is cited therein; however, it is not included in the RETS and is not a part of the license. In addition the Offsite Dose Calculation Manual (ODCM) which was submitted January 4, 1983 has been found to be an acceptable reference to use with the RETS. It is also not included in the RETS and is not a part of the license.

A copy of the Safety Evaluation is also enclosed. Notice of Issuance will be included in the Commission's Bi-Weekly Federal Register Notice.

You should assure that any safety-related employee concerns currently under review by the Employee Concern Task Group and pertaining to this issue are appropriately addressed prior to start-up of the Browns Ferry Units.

Sincerely,

Original signed by

Marshall Grotenhuis, Project Manager
