Subject: DRAFT REGULATORY GUIDE DG - 1077

Dear Sir/Madam,

I have studied the Draft Regulatory Guide DG 1077, which was sent by NRC and is issued for comments. My observations are given below:

(i) I am of the opinion that the optical cables which form the data highway should also be included in the environmental qualification program. These have modes of failure which are different from the cables used in analog systems. As a result the current standards may not be adequate.

(ii) The penetration assemblies which will be used for bringing out the optical cables will also have to be qualified for the applicable environmental requirements - may be applicable to Category A locations. These may also be included in the scope of this RG.

I thank NRC for sending the documents to me.

With regards,

Sincerely
A.S. Hunjan
