SYNOPSIS

The Office of Investigations, U.S. Nuclear Regulatory Commission, Region II, initiated this investigation on October 8, 1999, after a St. Lucie Nuclear Plant (PSL) contract Health Clinic administrator alleged the PSL security manager withdrew his site access authorization for reporting safety concerns. Hummer Whole Health Management, alleged's employer, subsequently terminated the alleged's employment when alleged could no longer gain access to PSL. Alleged raised additional technical concerns which were addressed separately by the Region II Staff.

The investigation included review of pertinent documents and interviews of alleged, the PSL security manager, PSL Speakout investigator, and Hummer Whole Health Management personnel. The investigation did not substantiate that PSL discriminated against alleged for reporting safety concerns.
