

January 9, 2002

Mr. Oliver D. Kingsley, President
Exelon Nuclear
Exelon Generating Company, LLC
LaSalle Nuclear Power Station
4300 Winfield Road
Warrenville, IL 60555

SUBJECT: DELAY OF LASALLE SAFETY SYSTEM DESIGN AND PERFORMANCE
CAPABILITY INSPECTION

Dear Mr. Kingsley:

This is in response to your letter dated January 4, 2002, requesting that NRC reschedule the LaSalle Safety System Design and Performance Capability inspection which is currently scheduled for April 29 through May 10, 2002. Your letter stated that the basis for this request was the Exelon Generation Company (EGC), LLC, decision to replace 100 percent of its LaSalle County Station, Unit 2, Safety Relief Valves in maintenance outage L2P01, currently scheduled for April 9 through 28, 2002. After review of the reasons for rescheduling the inspection, including NRC staffing capabilities and agreement by another licensee to take the time slot, we agree to defer the inspection. We will inform you of the revised date at a later time.

If you have questions regarding the NRC actions discussed above, please contact Mr. Ronald Gardner at 630-829-9751.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

Sincerely,

/RA/

John A. Grobe, Director
Division of Reactor Safety

Docket Nos. 50-373; 50-374
License Nos. NPF-11; NPF-18
