JUL 19 1974

Docket Nos. 50-259/260/296

Tennessee Valley Authority
ATTN: Mr. James E. Watson
Manager of Power
818 Power Building
Chattanooga, Tennessee 37401

Gentlemen:

Amendments to the Commission's regulations (10 CFR 50.59) relating to the manner in which proposed changes in the technical specifications for facility operating licenses are to be requested and acted upon became effective on April 22, 1974. The purpose of this letter is to call this to your attention and point out that all future requests for technical specification changes that you submit after receiving an operating license must be in the form of an application for a license amendment in accordance with the applicable provisions of Parts 2 and 50 of 10 CFR Chapter I.

Note that Section 50.30(b) of 10 CFR Part 50 requires that applications be executed in three signed originals by the applicant or duly authorized officer thereof under oath or affirmation. In addition to the three signed originals, 37 conformed copies of all portions of those applications requesting technical specification changes for power facilities should be filed.

Sincerely,

Original Signed by
John F. Stolz

Voss A. Moore, Assistant Director
for Light Water Reactors, Group 2
Directorate of Licensing
