Docket No. 50-324

Carolina Power & Light Company
ATTN: Mr. J. A. Jones
Executive Vice President
336 Fayetteville Street
Raleigh, North Carolina 27602

Gentlemen:

We were informed on August 11, 1975, by Mr. R. Black of your company that the technical specification deletion requested in your letter of June 13, 1975 is required by August 12, 1975 to permit running of a recirculation pump test scheduled to be performed on August 12, 1975. Our review of your June 13, 1975 request regarding deletion of technical specification 3.6.F.1 has been completed and we have determined that deletion of specification 3.6.F.1 does not involve a significant hazards consideration and is accepted.

We deferred action on your request of June 13, 1975, on the basis that it was not required for your startup test program, and expected to incorporate our conclusions with a later license amendment. However, as Mr. Black indicated the requested change is required for your startup test program.

This letter provides our authorization for deletion of technical specification 3.6.F.1 effective on August 12, 1975. We will confirm this letter with an amendment to License DPR-62 reflecting this deletion.

Sincerely,

signed by
Walter Butler
