UNITED STATES NUCLEAR REGULATORY COMMISSION

DOCKET NO. 50-324

CAROLINA POWER AND LIGHT COMPANY

NOTICE OF PROPOSED ISSUANCE OF AMENDMENT
TO FACILITY OPERATING LICENSE

The U.S. Nuclear Regulatory Commission (the Commission) is considering issuance of an amendment to Facility Operating License No. DPR-52 issued to Carolina Power and Light Company (the licensee) for operation of the Brunswick Steam Electric Plant, Unit No. 2, located in Brunswick County, North Carolina.

In accordance with the licensee's request dated September 22, 1977, the amendment would consider a reevaluation of Emergency Core Cooling System (ECCS) cooling performance submitted in accordance with the Commission's Order for Modification of License dated March 11, 1977. This reevaluation not only corrected the errors noted in the March 11, 1977 Order but also included the effect of certain other recently approved model changes in the ECCS evaluation models. These changes would permit an increase in authorized Maximum Average Planar Linear Heat Generation Rates for 7 X 7 fuel and establish such limits for new 8 X 8 fuel, and are the aspects of the amendment covered by this notice.

Prior to issuance of the proposed license amendment, the Commission will have made the findings required by the Atomic Energy Act of 1954, as amended (the Act), and the Commission's rules and regulations.
