Yes

No

Moved to an Agreement State?

N/A

Yes

No

Describe Follow-up: (Telephone, Internet, Chamber of Commerce, Other)

Checked terminated RIV license files. Reviewed terminated archived license file 49-11741-01. The US Steel facility in Lander was closed in 1983 and subsequently sold to a salvage operation, Universal Equipment Company. In June 1985, US Steel asked that their NRC specific license 49-11741-01 be transferred to Universal Equipment Company. A compliance inspection was conducted by RIV 8/7/1990 of Universal Equipment Company and indicated that the plant was being demolished for salvage and scrap. During the inspection, the inspector was told by the licensee that Texas Nuclear came on site, removed and shipped the gauges to Chile. A letter from the licensee dated 8/15/1990 confirmed that all devices were sent to Abastecimentos, Chile. This letter also requested termination of license 49-11741-01. License was terminated 9/28/1990.

Describe Communication with Registration Vendor:

None

Vendor Follow-up Action:

None

Final Action Taken:

Update RIV database, notify NRC GL Manager

Cause of Bad Address/Lesson Learned:

Facility was dismantled.

For additional GI D's received by the licensee: None								

¹Include only registerable gauges identified by Headquarters as "open" cases.

²Accounted for: A device is accounted for if (1) the device is located at the licensee's facility, (2) it has been verified that the device has been transferred to an authorized recipient or properly disposed, or (3) a reasonable assurance has been provided that the device has been transferred to an authorize recipient or properly disposed.

³Not Accounted for: A device is not accounted for if the location of the device is unknown and/or the licensee cannot provide a reasonable assurance that the device has been transferred to an authorized recipient for proper disposal.

FORM TI-3 GENERAL LICENSEE INSPECTION DOCUMENTATION

RCODEs: 2435, 1436, and 3868

General Licensee Information:

Check Box if Current Complete Name, Mailing Address, Contact, and Phone Number is Same as Provided by ORNL. If not, include correct information below:

Not Applicable.

Results of inspection: (check the appropriate boxes)

The general licensee of record is located at the address of record and

all GLD are accounted for

not all GLD are accounted for

The general licensee of record is not located at the address of record, however GLD are being used under new ownership at the address of record and

all GLD are accounted for

not all GLD are accounted for

The general licensee of record is not located at the address of record, however they are using GLD at another location and

all GLD are accounted for

not all GLD are accounted for;

Neither the general licensee of record nor the facility operated by the general licensee are located at the address of record and the site has been abandoned or is being used for an alternate purpose.

X Other: (explain) GL not inspected. Devices were possessed under Universal Equipment Company NRC specific license 49-11741-01. License was terminated 9/1990. All devices were sent to Abastecimentos, Chile.

Gauge Information:

ID For each gauge for which status is unaccounted for (see last column of Form TI-2), provide any conclusions about location of the gauge:

Gentlemen:

By means of this correspondence and attached NRC Form 314, please be advised that Atlantic City Ore Operations of United States Steel Corporation, P. O. Box 569, Lander, Wyoming 82520, NRC License Number 49-11741-01 has transferred the following gauges containing licensed by-product material to ~~University~~ ^{universal} Equipment Company, Atlantic City Ore Operations, P. O. Box 49, Lander, Wyoming 82520, NRC License Number 49-11741-01.

Gauges Containing By-Product Material -
Specific License

- (1) Nuclear Chicago, Model 850233, Serial No. 685, 500 millicuries, Cesium - 137
- (1) Industrial Nucleonics (AccuRay), Type 5-6, Serial No. 6389322, 50 millicuries, Cesium - 137

Gauges Containing By-Product Material -
General License

- (6) Texas Nuclear, Model 5191, 100 millicuries, Cesium - 137, Serial Numbers B1528, B1529, B1530, B1531, B1532, B1533
- (7) Texas Nuclear, Model 5191, 50 millicuries, Cesium - 137, Serial Numbers B1522, B1523, B1524, B1525, B1526, B1527, B1855

Since United States Steel Corporation no longer possesses by-product material under License Number 49-11741-01, termination of this license is requested.

Very truly yours,

J. B. Masaitis

Attn: Bob Brown

Gentlemen,

Confirming our telephone conversations yesterday, Universal has shipped all nuclear devices that were located at the mine site in Atlantic City, Wyoming to Abastecimentos in Chile. The shipping papers I faxed to you confirm this.

Since we no longer have in our possessions any nuclear devices, a certificate or license will not be required. Please cancel our license effective immediately.

If I can be of further assistance, please call.

Sincerely,

Robert Vance

Comments/Other Information

Other Licenses Contained in the File:

General Comments: CS-137 SEALED SOURCES FOR DENSITY/LEVEL DEVICES.

Inventory Record Comments:

Amendment 10 issued 4/16/85 changed the name of the licensee from United States Steel Corporation.

Licensee letter dated 8/15/90 indicates that all nuclear devices were shipped to Abastecimentos, Chile and the licensee no longer possessed only material. Shipping records were attached.

Compliance inspection conducted 8/7/90 indicates that the plant was being demolished for salvage and scrap at the time. The report indicates that Texas Nuclear came to the site and removed the gauges and shipped them to Chile.
