SUBJECT: Indian Point 3 Nuclear Power Plant
Docket No. 50-286
License No. DPR-64
Response to NRC Special Inspection Report 2001-006

Dear Sir:

Entergy has read and accepted the non-cited violation of 10 CFR 50.59 for the Backup Spent Fuel Pool Cooling System (BUSFPCS) for failure to identify an increase in the probability of a malfunction of equipment important to safety. As part of our corrective action program, administrative controls were established to assure compliance with 10 CFR 50.59 by precluding operation of the BUSFPCS as a backup to the normal Spent Fuel Pool Cooling System (SFPCS). The original design as a "backup" system limited use to those periods when the SFPCS had to be taken out of service for maintenance as allowed by the FSAR. It is our intent to evaluate the BUSFPCS using the revised 10 CFR 50.59 criteria. The evaluation will be consistent with the finding of the violation, i.e., any alternative system that will perform the function of a system important to safety when that system is out of service must be evaluated as an equivalent system rather than a backup system.

Indian Point 3 is not making any new commitments associated with this letter. If you have any questions regarding this submittal, please contact Mr. J. Donnelly.

Very truly yours,

A handwritten signature in dark ink, appearing to read "Robert J. Barrett".
