Subject:

subtle deregulation

Chief, Rules and Directives Branch/ Division of Administrative Services/ Mailstop T 6 D 59 US Nuclear Regulatory Commission Washington, DC 20555-0001

It has come to my attention that the Nuclear Regulatory Commission is possibly compramising the security of our nations future by making way for further build up of nuclear waste that will theoreticly be safe in so many thousands of years. I am opposed to any extensions on operating licenses for nuclear facilities of any sort and wish for a move to cleaner renewable energy.

Thank you. U.S. Voter Benjamin Schlau 1163 Lazy Ln. Ct. Mt. Pleasant, SC 29464

The Nuclear Regulatory Commission has already relaxed and is further relaxing its decommissioning requirements for nuclear power reactors.

NRC is justifying these regulatory changes by "supplementing" the 1988
Generic Environmental Impact Statement on Decommissioning Nuclear
Facilities (NUREG-0586) with new, "updated"

information on nuclear

power

reactor decommissioning. If NRC succeeds, many key issues that local

communities face as reactors close and owners leave (liability-free)

will be unchallengeable, because they are being listed as "generic"

issues. "Generic" decommissioning issues are ones that NRC determines

apply to numerous reactors and which are supposedly being resolved with

this Supplement to the Generic Environmental Impact Statement. "Site

specific" issues are ones that can still be raised in local

communities,

but the opportunities to address even site-specific issues is being

curtailed dramatically. NIRS supports the designation

Rules and Disches

Rules and Disches

Temple = ADN-013

E-RFDS=ADM-03 Cad = M.MASNIK (MTM2) of environmental justice and endangered species issues as site-specific (not generic).
NIRS opposes Rubblization but supports its designation as site-specific.
