Subject: Re: IP2 SG Inspection

A few minor comments on the inspection plan recognizing that it most likely will end up on the web page.

o Para. I. B. - Add to the end of the paragraph 'in 2000.' This will make it clear we're talking about current time as opposed to 1997 time which is the subject of I. A.

o Para. II. A. - Add a new sentence after the lead in sentence as follows: 'It is important here to recognize state-of-the-art eddy current techniques available in 1997.'

o 3rd paragraph under Para. II. A. that begins with 'Review (1) qualification ...' - make analyst plural in 1st, 2nd, and 3rd lines of this paragraph. Also delete 'of' at end of first line between 'training' and 'provided.'

>>> David Lew 06/05 2:00 PM >>>

Attached is revision 3 of the SG inspection plan, which incorporates comments received to this point. This revision reflects comments from the NRR technical staff, as well as NRR and Region I management.
