Director--Region #1

Dear Mr. O'Reiley:

This is to bring to formal attention my complaint against
Wyeth Laboratories, King of Prussia Road, Radnor, Pa.

In February of this year I was discharged from Wyeth after
five and one half years. During the final year of my employment,
I was participating in radioimmunoassay procedures which involved
tagging certain peptides with I¹²⁵. While involved in these
radioiodinations, it was a routine practice to be checked once
monthly to detect exposure. This involved the scanning of the
thyroid with a counter to detect presence of radio-iodine.

At the time of my discharge, I was due for such a safety check and
immediately requested that this final safety procedure be undertaken.
My request at that time (2/26/75) as well as three subsequent requests
(one via my attorney, Leonard B. Gordon) have been ignored.

My wife is five months pregnant, and along with her physician and
myself, she is concerned by the company's irresponsible attitude in
adhering to their safety requirements. I trust that your agency will
take an interest in this matter, and follow through with appropriate
action.

Sincerely,
