Frederick Sturz  
Section Chief  
U.S. Nuclear Regulatory Commission  
Mailstop T: 8F5  
Washington, DC 20555

Dear Mr. Sturz:

We have completed inactivation actions on 90 sealed source and device certificates for AEA Technology QSA, Inc. (vendor code 1059). We have elected to transfer these inactivated certificates to you in batches of about 10 to 20 certificates at a time. The first batch of 9 certificates is enclosed with this package.

These inactivations were requested by AEA Technology QSA, Inc. following the 1999 transfer of over 120 certificates for sealed sources and devices originally manufactured and distributed by Nycomed Amersham (vendor code 0136) in Illinois. Many of these sources and devices are no longer manufactured and some were never manufactured.

If you have any problems or questions regarding the transfer please contact me at (617) 727-6214, extension 2027.

Sincerely,

A handwritten signature in black ink that reads "Kenath O. Traegde". The signature is fluid and cursive.

Kenath O. Traegde, Supervisor  
Materials Licensing Unit  
Radiation Control Program
