Subject: Oyster Creek Generating Station
Docket 50-219
Long Range Planning Program (LRPP)
Annual Update of Integrated Schedule
"ABC" Projects Listing - December 2001

Pursuant to condition 2.C.(6) of Operating License DPR-16, AmerGen Energy Company, LLC, has implemented the Long Range Planning Program for the Oyster Creek Generating Station. As required by Section V.A of the Plan, the following attachments are submitted to provide the annual project list update:

1. Attachment A contains a new list of Category A, B and C projects, annotated by an asterisk (*) to identify new projects. Completed projects have been removed from the list.
2. Attachment B contains a summary of Category A, B, and C projects which have been completed, deleted, deferred, or changed in scope. Category A and B projects which have had schedule changes are provided with explanations, as appropriate.

Category A projects reflect regulatory requirements with implementation dates mandated by rule, order, or license condition. They may not be changed without prior approval of the NRC. Category B projects address other regulatory requirements and require notification of the NRC with time for NRC review prior to the scheduled implementation date. Category C projects are non-regulatory and do not require prior NRC approval or notification.

A001

Pursuant to the LRPP for Oyster Creek, if you do not respond to this submittal within 15 days of receipt, it will be assumed that you are in agreement with the actual Category B changes attached.

If you have any questions concerning the update or require more information, please contact Mr. John Rogers, of my staff, at 609.971.4893.

Very truly yours,

A handwritten signature in black ink, appearing to read 'Ron J. DeGregorio', with a large, sweeping flourish extending to the right.

Ron J. DeGregorio
Vice President, Oyster Creek

ABC Classifications

- a) Meet NRC Requirements (NRR) - Activities that: a) Must be carried out to fulfill specific NRC requirements; b) have been committed to the NRC by the company; or c) are such that if not accomplished would result in an NRC noncompliance even though the specific activity is not required by the NRC.
- b) Meet Environmental Requirements (ERR) - Activities that: a) are specifically required by environmental regulatory agencies (State & Federal); b) have been committed to environmental agencies by the Company; or c) are such that if not accomplished would result in regulatory non-compliance even though the specific activity is not required by an environmental regulatory agency.
- c) Meet other Requirements (ORR) - Activities not covered by the NRC or environmental requirements but that are required by local, state, or federal ordinances, codes, court order or lawsuit settlement, or other guidance to which the Company is committed, or if not accomplished, would result in a violation of that ordinance, code, guidance, court order, etc.
- d) Increase Safety Margins (ISM) - Activities that, if implemented, will improve nuclear plant or personnel safety, but are neither required by regulatory compliance nor required by safety regulations, codes or guidance.
- e) Decrease Environmental Effects (E) - Activities that, if implemented, will result in an improved environmental quality but are neither required for regulatory compliance nor required by environmental regulations, codes, or guidance.
- f) Improve Radiological Conditions (RAD) - Activities that, if implemented, will result in improved radiological conditions, lower man-rem exposure rates, or radwaste control/reduction, but are neither required for regulatory compliance nor required by radiological regulations, codes, or guidance.
- g) Maintain Reliability/Capability (MRC) - Activities that, if implemented, will maintain power production at existing levels by preventing deterioration of plant systems or equipment. Includes activities in response to national codes and standards, insurance policies, equipment vendor specifications or nuclear industrial high unavailability data without which the plant could not operate prudently.
- h) Improve Reliability/Capability (REL) - Activities that, if implemented, will increase the power generation by improving availability or capacity factor to maximize energy output.

- i) Improve Operational Effectiveness (IOE) - Activities that, if implemented, will improve staff efficiency or provide a direct economic payback in terms of reduced operating/maintenance costs.
- j) Improve Personnel Facilities (FAC) - Activities that, if implemented, will improve working conditions and the usefulness of personnel facilities.
- k) Provide Contingency/Blanket (CUI) - Activities that, if implemented, will provide management flexibility to respond in a timely manner to emergent work requirements or the ongoing requirements to procure, replace or repair minor items essential to support routine operations.
- l) Improves Heat Rate Performance (HRP) - Activities that, if implemented, will increase power production by enhancing the heat rate efficiency.
- m) General Working Conditions (GWC) - Activities, tools and equipment that if implemented will improve working conditions, but will not demonstrate a direct economic payback.
