The Commission has issued the enclosed Amendment Nos. 62 and 88 to Facility Operating License Nos. DPR-71 and DPR-62 for Brunswick Steam Electric Plant, Units 1 and 2. The amendments consist of changes to the Technical Specifications in response to your application dated December 13, 1982 supplemented by letters dated October 17 and November 11, 1983 and discussions between the NRC staff and your staff. These changes have been discussed with and agreed to by members of your staff.

These amendments authorize changes to the Technical Specifications (1) to implement the requirements of Appendix I of 10 CFR Part 50; (2) to establish new limiting conditions for operation for the quarterly and annual average release rates; and (3) to revise environmental monitoring programs to assure conformance with the Commission's regulations.

As part of the December 13, 1982 application, you submitted copies of the Offsite Dose Calculation Manual and the Process Control Program. We have reviewed the Offsite Dose Calculation Manual and the Process Control Program and have found them acceptable.

A copy of the Safety Evaluation is also enclosed.

Sincerely,
