Serial No. F2001-009

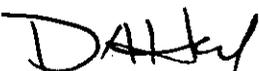

Dear Mr. Gotzmer:

PROJECT NO. 6335-VA / NATDAM NO. VA83005
NORTH ANNA HYDROELECTRIC PROJECT
SECURITY MEASURES AT HYDROPOWER FACILITIES

On October 22, 2001, we received your letter regarding security measures at hydropower facilities dated October 17, 2001. Following the events of September 11, 2001, the North Anna Power Station initiated heightened security measures at our facility including the hydroelectric project. Subsequently, on October 6, 2001, the Nuclear Regulatory Commission (NRC) issued a Safeguards Advisory Update for Power Reactors outlining security measures to be taken by the electric utilities. Part of the Safeguards Advisory Update included protection of sensitive information available to the public. All information deemed inappropriate for the general public has been removed from company controlled facilities including internet websites. The North Anna Power Station continues to implement prudent security measures above the minimum required by the advisory update. All of the actions noted in your letter regarding access controls, site monitoring and coordination with law enforcement agencies have been implemented.

Should you have any questions please contact Mr. M. P. Whalen at (540) 894-2572.

Very truly yours,

David A. Heacock
Site Vice President
