Change No. 4
License No. DPR-23

Carolina Power & Light Company
ATTN: Mr. J. A. Jones
Senior Vice President
Engineering & Operating
336 Fayetteville Street
Raleigh, North Carolina 27602

Gentlemen:

By TWX and letter dated August 23, 1971, you requested an amendment to the Technical Specifications (Appendix A to Provisional Operating License DPR-23) for Unit 2 of the H. B. Robinson facility. The proposed action, which we designated Change No. 4, clarified the language pertaining to the definition of rated power for the Robinson facility.

On August 24, 1971, we authorized Change No. 4 by TWX to you. The authorization was based on our conclusion that the change did not present significant hazards considerations not described or implicit in the safety analysis report and that there was reasonable assurance that the health and safety of the public would not be endangered.

This letter confirms that Change No. 4 to the Technical Specifications of Provisional Operating License No. DPR-23 was approved and changed as set forth in Enclosure A.

Sincerely,

Original signed by F. Schroeder *FS*

Peter A. Morris, Director
Division of Reactor Licensing

Enclosure:

Enclosure A - Change No. 4
to Technical Specifications
(Appendix A to DPR-23)
