Mr. E. E. Utley, Executive Vice President  
Power Supply and Engineering & Construction  
Carolina Power and Light Company  
Post Office Box 1551  
Raleigh, North Carolina 27602

Dear Mr. Utley:

The Commission has issued the enclosed Amendment No. 85 to Facility - *SEE Ammts to FOL*  
Operating License No. DPR-23 for the H. B. Robinson Steam Electric  
Plant Unit No. 2. This amendment consists of changes to the Technical  
Specifications in response to your request dated November 10, 1980, as  
supplemented on February 7 and October 25, 1983, and January 13, February 7,  
and May 9, 1984.

The amendment would revise the radioactive waste management portions of the  
Technical Specifications to comply with Section V of Appendix I of 10 CFR  
Part 50 as clarified by staff positions expressed in NUREG-0742.

In addition, we have reviewed your Offsite Dose Calculation Manual (ODCM)  
submitted by letter dated October 6, 1983. We find that this ODCM generally  
uses documented and approved methods that are consistent with the methodology  
and guidelines in NUREG-0133 and, therefore, is an acceptable reference.  
Discrepancies found in our review should be corrected in the next revision of  
the ODCM (see Enclosure 3 Section 3.3).

A copy of the related Safety Evaluation is enclosed. A Notice of Issuance  
will be included in the Commission's next regular monthly Federal Register  
notice.

Sincerely,

/s/GRequa

Glude Requa, Project Manager  
Operating Reactors Branch #1  
Division of Licensing
