NRC NOTICE OF VIOLATION FOR REPEATED ITEMS OF NONCOMPLIANCE

Attached is an NRC letter citing Jersey Central Power and Light (JCP&L) for repeated noncompliance of regulations in the areas of radiation safety and plant security. A cumulative fine of \$26,000 is proposed.

NRC noted that ninety items of noncompliance have been identified in the past three years. Of these items, twenty-four were related to radiation protection. Such items as "failure to follow radiation protection procedures" has been cited six times in the past, and "failure to control high radiation areas" has been cited three times before.

If you feel this situation warrants further attention, please let me know.

Paul Boehnert
Reactor Engineer
