Dear Mr. Utley:

On September 18, 1986, the Commission issued Amendment No. 103 to Facility Operating License No. DPR-23 for the H. B. Robinson Steam Electric Plant, Unit No. 2. The amendment revised the Technical Specifications by eliminating the requirement for shutting down the ventilation system in the fuel handling building on a high radiation signal, reduced the waste gas decay tank radioactivity limit, and corrected the bases for the control of explosive gas mixture in the waste gas decay tanks. The amendment also involved changes of an editorial nature.

Your staff has brought to our attention an administrative error made on the second page of the amendment to the Facility Operating License. On the bottom of the second page, "Date of Issuance: 103" should read "Date of Issuance: September 18, 1986." Enclosed is the corrected version of this page.

Please accept our apologies for any inconvenience this error may have caused.

Sincerely,

Original Signed by

Glode Requa, Project Manager
