INSERVICE INSPECTION SUMMARY REPORT

Dear Sir or Madam:

In accordance with the reporting requirements of the ASME Boiler and Pressure Vessel Code, 1989 edition, Section XI, Article IWA-6220(c), this letter submits a correction to the Inservice Inspection Summary Report for Carolina Power and Light Company's Harris Nuclear Plant (HNP). By letter dated October 18, 2000, HNP submitted a report that covered the inspections performed at HNP during Cycle 9 operations, including the Refueling Outage No. 9, in the second 10-year inservice inspection interval. The attached enclosure corrects minor discrepancies made in the October 18, 2000 letter. The corrected values remain within the acceptance criteria for weld inspections.

Questions regarding this matter may be referred to Mr. J. R. Caves at (919) 362-3137.

Sincerely,

  
James Scarola
