 St. Petersburg, Florida 33733

Dear Mr. Hancock:

The Commission has issued the enclosed Amendment No. 62 to Facility Operating License No. DPR-72 for the Crystal River Unit No. 3 Nuclear Generating Plant in response to your submittal of March 19, 1982.

The amendment modifies the license to include a requirement to maintain a Guard Training and Qualification Plan to be followed in accordance with 10 CFR 73.55(b)(4) within 60 days of this approval. All security personnel shall be qualified within two years of this approval.

We have completed our review and evaluation of your Guard Training and Qualification Plan and have concluded that the plan for your facility, when fully implemented, will provide the protection needed to satisfy the objectives of the specific requirements of 10 CFR 73.55(b)(4) and Appendix B to 10 CFR 73. We, therefore, further conclude that your Guard Training and Qualification Plan is acceptable.

Changes which would not decrease the safeguards effectiveness of your approved Guard Training and Qualification Plan may be made without approval by the Commission. A report containing a description of each change shall be furnished to the Regional Administrator of NRC Region II within two months after the change is made. Records of changes made without Commission approval shall be maintained for a period of two years from the date of change.

The amendment applies to the Guard Training and Qualification Plan and, therefore, does not authorize a change in effluent types or total amounts nor an increase in power level, and will not result in any significant environmental impact. Having made this determination, we have further concluded that the amendment involves an action which is insignificant from the standpoint of environmental impact and pursuant to 10 CFR 51.5(d)(4) that an environmental impact statement, or negative declaration and environmental impact appraisal need not be prepared in connection with the issuance of the amendment.

Mr. J. A. Hancock

-2-

This amendment does not involve a significant increase in the probability or consequences of an accident previously evaluated, does not create the possibility of an accident of a type different from any evaluated previously, does not involve a significant reduction in a margin of safety and therefore does not involve a significant hazards consideration. We have also concluded that there is reasonable assurance that the health and safety of the public will not be endangered by this action, that such activities will be conducted in compliance with the Commission's regulations, and the issuance of this amendment will not be inimical to the common defense and security or to the health and safety of the public.

Your Guard Training and Qualification Plan and related materials consist of Safeguards Information required to be protected from unauthorized disclosure in accordance with the provisions of 10 CFR 73.21.

A copy of the Notice of Issuance is also enclosed.

Sincerely,

ORIGINAL SIGNED BY
JOHN F. STOLZ
