

Wednesday, January 23, 2002

Mr. John Hannon  
Branch Chief – Plant Systems  
United States Nuclear Regulatory Commission  
Washington, D.C. 20555

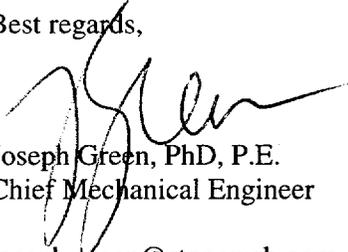

Dear Mr. Hannon;

Pursuant to our telephone discussion of January 22, 2002, I would like to formally request a copy of the Technical Evaluation Report related to containment mixing during spray. This report was performed last year for Millstone Unit 3, although the licensee has now cancelled that particular request. Stone & Webster agrees to pay the fee of \$150/hr for an estimated 8 hours of time required to create the non-proprietary version of the report. You can bill us at the address listed below.

Following our review of the report, a decision will be made whether to pursue the potential for conducting a topical report on this matter. Stone & Webster would appreciate any information you may have on the process required for conducting topical reports.

If you need any further information you can reach me at (617-589-1400)

Best regards,

Joseph Green, PhD, P.E.  
Chief Mechanical Engineer
