Re: Purchase of HRPD Systems.

Dear [ ]

This is a follow up to our letter of 30 June 1998 concerning the HRPD systems for our Morocco and Thailand projects. The schedules for both programs require placing the purchase orders for both systems within the next calendar quarter. We therefore need to get responses to our earlier letter in a timely fashion so that we may proceed with the procurement process for these systems.

The need to move forward quickly is particularly important since these systems are long lead items which require early delivery for the installation and commissioning in a timely fashion to avoid substantial late penalties.

We need to receive from you the assurance that these important systems will be made available to us on the agreed upon schedule and price.

We look forward to an early reply.
