10 CFR 50.4

U. S. Nuclear Regulatory Commission  
Attn: Document Control Desk  
Washington, DC 20555

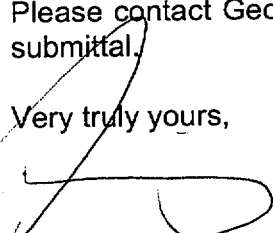

RE: St. Lucie Units 1 and 2  
Docket Nos. 50-335 and 50-389  
Annual Summary of Commitment Changes Implemented  
Without Prior NRC Notification for Calendar Year 2001

In Regulatory Issue Summary (RIS) 2000-17, NRC endorsed Nuclear Energy Institute (NEI) 99-04, *Guidelines for Managing NRC Commitment Changes*, as an acceptable method to manage regulatory commitments. RIS 2000-17 stated that the definitions and guidance in NEI 99-04 are consistent with the principles described in NRC Commission papers and NRC internal guidance documents. The NRC encouraged licensees to use the NEI guidance or similar controls to ensure that regulatory commitments are implemented and that changes to regulatory commitments are evaluated and, when appropriate, reported to the NRC.

St. Lucie Plant has adopted a commitment management program that contains controls that are similar to NEI 99-04. As part of the commitment management program at St. Lucie Plant, this is the first annual summary of commitment changes that were implemented without prior NRC notification. The attached report is for the calendar year 2001.

Please contact George Madden at 772-467-7155 if there are any questions about this submittal.

Very truly yours,

Donald E. Jernigan  
Vice President  
St. Lucie Plant

Annual Summary of Commitment Changes Implemented Without Prior NRC Notification for Calendar Year 2001		
Source	Brief Commitment Summary	Change Summary & Bases for the Change
NRC IR 97-13 Violation B L-98-006 Violation B Corrective Action 4.B.	FPL will increase the frequency and enhance training for tele-dosimetry. Annual requalification tele-dosimetry training will use the on-the-job training (OJT) method.	Initial qualification training will use the OJT method. The requalification training will use a method approved by the HP training review committee only after the trainee has successfully completed initial training using the OJT method. The change does not affect the frequency or level of training. The level of training will be equivalent to the original commitment. The implementation method used to accomplish the training has been changed. The change continues to meet the intent of the initial corrective action.
