UNITED STATES NUCLEAR REGULATORY COMMISSION

FLORIDA POWER CORPORATION, ET AL.

DOCKET NO. 50-302

NOTICE OF WITHDRAWAL OF APPLICATIONS FOR
AMENDMENTS TO FACILITY OPERATING LICENSE

The United States Nuclear Regulatory Commission (the Commission) has granted the withdrawal of five applications filed by Florida Power Corporation. The applications, described below, requested amendments to Facility Operating License No. DPR-72 for operation of the Crystal River Unit No. 3 Nuclear Generating Plant located in Citrus County, Florida.

An application dated January 24, 1985, proposed Technical Specification (TS) changes to delete the allowance to test only certain test groups in the engineered safety features circuitry during Cycle 5 since testing of all groups would be possible during Cycle 6. The Commission issued a Notice of Consideration of Issuance of Amendment in the FEDERAL REGISTER on June 19, 1985 (50 FR 25485).

An application dated August 30, 1984, as supplemented on June 17, 1985, proposed TS changes to revise the old remote shutdown system to be consistent with the new system and add operability and surveillance requirements. The Commission issued a Notice of Consideration of Issuance of Amendment in the FEDERAL REGISTER on November 21, 1984 (49 FR 45949). The request was partially granted in Amendment No. 75 issued on July 3, 1985, by revising the location of several remote shutdown monitoring instruments from the Engineered Safeguards (ES) Switchgear Room to the Remote Shutdown Panel. However, the balance of the request which involved incorporation of the new Remote Shutdown System into the TSs was to be completed as a separate action. Further action on this issue was withdrawn by the licensee's letter of December 19, 1985.

An application dated May 26, 1982, as supplemented February 3, 1984, proposed TS changes to modify a limiting condition for operation (LCO) for the cooling water intake canal such that a minimum cross-sectional area must be maintained rather than an absolute canal bottom datum level. The Commission issued a Notice of Consideration of Issuance of Amendment in the FEDERAL REGISTER on December 21, 1983 (48 FR 56504).

An application dated July 25, 1984, as supplemented on December 19, 1984, proposed TS changes to permit auxiliary building ventilation system inoperability for up to 12 hours for maintenance purposes as well as for surveillance testing which was allowed. The Commission issued a Notice of Consideration of Issuance of Amendment in the FEDERAL REGISTER on October 9, 1984 (49 FR 39628).

An application dated November 20, 1979, as supplemented on November 19, 1982, proposed TS changes to allow more flexibility in allowable outage time and/or allowable calibration error in out-of-core instrumentation. This request was not noticed.

By letter dated December 19, 1985, the licensee withdrew the above applications for amendments. The Commission has considered the licensee's request for the withdrawals and has determined that permission to withdraw the subject applications should be granted.

For further details with respect to this action, see (1) the individual applications referenced above, and (2) the licensee's letter dated December 19, 1985.

All of the above documents are available for public inspection at the Commission's Public Document Room, 1717 H Street, N.W., Washington, D.C., and at the Crystal River Public Library, 668 N.W. First Avenue, Crystal River, Florida.

Dated at Bethesda, Maryland this 13th day of March 1986.
