**Subject:** Ticket G20020109 "Radiation Monitoring Badges"

Subject ticket was for a letter to the Chairman from Mr. Craig Yoder at Landauer. In the letter, Mr. Yoder expressed concern that irradiation of the mail could have a widespread impact on the distribution of dosimeters.

The ticket is "For Appropriate Action."

I phoned Mr. Yoder and discussed the issue of mail irradiation and dosimeters with him, including the involvement of the NRC with the USPS mail irradiation technical evaluation team. We also discussed that the current scope of USPS irradiation of mail is very limited. Mr. Yoder indicated that our phone conversation satisfied Landauer's expectations for NRC response to the letter.

The phone conversation discussed herein closes the subject ticket.
