Dear Mr. Mathews:

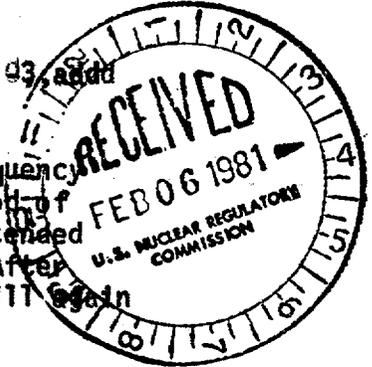

This confirms our telephoned authorization given today, January 30, 1981, for a change in the Technical Specifications for the Kewaunee Nuclear Power Plant as requested by your telecopy of January 29, 1981. The Facility Operating License No. DPR-43 is amended on this date, January 30, 1981, by making the following technical specification change:

Table TS 4.1-3 to be amended as follows:

(1). For Item 10, "Turbine Stop and Governor Valves," at the columns labeled "Frequency" and "Maximum Time Between Tests (Days)" add a second footnote designation by adding the number (2) alongside the footnote (1) already existing.

(2). At the bottom of the page of Table TS 4.1-3, add second footnote to read as follows:

"(2) A one-time extension of the frequency interval from monthly to a period of four months is granted, said extended period to end April 30, 1981. After April 30, 1981, monthly tests will be required."

Copies of the license amendment, our evaluation and Federal Register Notice for this technical specification change will be sent to you when completed.

Sincerely,

ORIGINAL SIGNED

Thomas M. Novak, Assistant Director  
Division of Licensing
