Millstone Nuclear Power Station, Unit No. 2  
Request RR-89-35 Clarification to a Response for Additional Information Regarding  
Use of Mechanical Nozzle Seal Assemblies (TAC No. MB4039)

In a letter dated February 19, 2002,<sup>(1)</sup> Dominion Nuclear Connecticut, Inc. (DNC), submitted a request to use mechanical nozzle seal assemblies (MNSAs) as an alternate repair method pursuant to 10 CFR 50.55a(a)(3)(i) for Millstone Unit No. 2. DNC letter dated February 28, 2002,<sup>(2)</sup> provided a response to six items of a request for additional information related to these installations. This letter provides further clarification to item 4.b in our response, to emphasize that VT-3 exams will be performed, along with VT-2 exams, during subsequent plant restarts following a refueling outage.

There are no regulatory commitments contained within this letter.
