SUBJECT: REVIEW OF PROPOSED AMENDMENT 135, REVISED HEATUP AND COOLDOWN LIMIT CURVES - KEWAUNEE NUCLEAR POWER PLANT (TAC NO. M92171)

Dear Mr. Marchi:

By letter dated April 28, 1995, you submitted Proposed Amendment (PA) 135 to the Kewaunee Nuclear Power Plant Technical Specifications to revise the heatup and cooldown limit curves. Subsequent to receiving your submittal, the Nuclear Regulatory Commission (NRC) staff issued Generic Letter (GL) 92-01, Revision 1, Supplement 1, "Reactor Vessel Structural Integrity," dated May 19, 1995. In your August 21, 1995, response to this GL, you stated that the pressure-temperature limit curves submitted as PA 135 would be revised, as necessary, following completion of the related industry activities described in your response.

The purpose of this letter is to inform you that the staff has discontinued its review of PA 135 pending completion of the industry efforts related to GL 92-01, Revision 1, Supplement 1, as described in your August 21, 1995, letter. When these industry efforts are complete, you should incorporate any applicable changes into your analysis and resubmit proposed heatup and cooldown limit curves for staff review and approval. This closes TAC No. M92171.

Sincerely,

Original signed by:

Richard J. Laufer, Project Manager
