

MISCELLANEOUS CORRESPONDENCE

FOR THE POINT BEACH INITIAL EXAMINATION - JAN/FEB 2002

October 2, 2001

Mr. M. Reddemann
Site Vice President
Kewaunee and Point Beach Nuclear Plants
Nuclear Management Company, LLC
6610 Nuclear Road
Two Rivers, WI 54241

Dear Mr. Reddemann:

In a telephone conversation on September 18, 2001 between Mr. Chuck Sizemore and Mr. Dell McNeil, arrangements were made for the administration of licensing examinations at the Point Beach Nuclear Plant the weeks of January 28, 2002 and February 4, 2002. In addition, the NRC will make an examination validation visit to your facility the week of January 7, 2002.

As agreed during the telephone conversation, your staff will prepare the examinations based on the guidelines in Revision 8, Supplement 1, of NUREG-1021, "Operator Licensing Examination Standards for Power Reactors." The NRC regional office will discuss with your staff any changes that might be necessary before the examinations are administered.

To meet the above schedule, it will be necessary for your staff to furnish the examination outlines by October 8, 2002. The written examinations, operating tests, and the supporting reference materials identified in Attachment 2 of ES-201 will be due by November 19, 2002. Pursuant to 10 CFR 55.40(b)(3), an authorized representative of the facility licensee shall approve the outlines, examinations, and tests before they are submitted to the NRC for review and approval. All materials shall be complete and ready to use. Any delay in receiving the required examination and reference materials, or the submittal of inadequate or incomplete materials, may cause the examinations to be rescheduled.

In order to conduct the requested written examinations and operating tests, it will be necessary for your staff to provide adequate space and accommodations in accordance with ES-402, and to make the simulation facility available on the dates noted above. In accordance with ES-302, your staff should retain the original simulator performance data (e.g., system pressures, temperatures, and levels) generated during the dynamic operating tests until the examination results are final.

Appendix E of NUREG-1021 contains a number of NRC policies and guidelines that will be in effect while the written examinations and operating tests are being administered.

ML012750351

M. Reddemann

-2-

To permit timely NRC review and evaluation, your staff should submit preliminary reactor operator and senior reactor operator license applications (Office of Management and Budget (OMB) approval number 3150-0090), medical certifications (OMB approval number 3150-0024), and waiver requests (if any) (OMB approval number 3150-0090) at least 30 days before the first examination date. If the applications are not received at least 30 days before the examination date, a postponement may be necessary. Signed applications certifying that all training has been completed should be submitted at least 14 days before the first examination date.

This letter contains information collections that are subject to the *Paperwork Reduction Act of 1995* (44 U.S.C. 3501 et seq.). These information collections were approved by the Office of Management and Budget, approval number 3150-0018, which expires on April 30, 2003.

The public reporting burden for this collection is estimated to average 500 hours per response, including the time for reviewing instructions, gathering and maintaining the data needed, writing the examinations, and completing and reviewing the collection of information. Send comments on any aspect of this collection of information, including suggestions for reducing the burden, to the Information and Records Management Branch (T-6 F33), U.S. Nuclear Regulatory Commission, Washington, D.C. 20555-0001, or by Internet electronic mail at BJS1@NRC.GOV; and to the Desk Officer, Office of Information and Regulatory Affairs, NEOB-10202, (3150-0018), Office of Management and Budget, Washington, D.C. 20503.

The NRC may not conduct or sponsor, and a person is not required to respond to, a collection of information unless it displays a currently valid OMB control number.

Thank you for your cooperation in this matter. Mr. Sizemore has been advised of the policies and guidelines referenced in this letter. If you have any questions regarding the NRC's examination procedures and guidelines, please contact Dell McNeil at 630-829-9737, or me at 630-829-9733.

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter and its enclosure will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

Sincerely,

David E. Hills, Chief
Operations Branch
Division of Reactor Safety

Mr. M. Reddemann
Site Vice President
Kewaunee and Point Beach Nuclear Plants
Wisconsin Electric Power Company
6610 Nuclear Road
Two Rivers, WI 54241

Dear Mr. Reddemann:

In response to your facility letters dated February 2, 2000, and September 18, 2000, we have tentatively scheduled an initial licensing examination for your operator license applicants at the Point Beach Nuclear Plant during the weeks of January 28 and February 4, 2002. Validation of the examination will occur at the station during the week of January 7, 2002. In the unlikely event that we are unable to support the examination during the scheduled weeks, we will inform you immediately upon discovery of such conditions and make arrangements to administer the examination at a mutually acceptable date.

As stated in your letters and confirmed in a telephone conversation between P. Walker, Point Beach and D. L. Pelton, NRC, on March 7, 2001, your staff will develop the examination. To support the examination administration date, we have tentatively scheduled the date of December 24, 2001, to begin our review of your submitted examination.

Your letter indicated you are training approximately 13 candidates for the examination. Please inform us if the number of candidates declines below 10 as this will impact the examination schedule. Please also inform us at your earliest opportunity if you discover you are unable to support the examination on the scheduled dates.

Once your staff has determined a schedule for examination development, please have them contact the Chief Examiner to arrange for a suitable examination outline submittal date for NRC review. The intent is for the examination outline to be submitted early in the examination development process. This is to preclude the need to make significant changes to developed examination material as a result of the NRC review of the outline. Mr. Dell R. McNeil has been tentatively assigned as the Chief Examiner and can be reached at 630-829-9737.

A supplementary letter will be sent to the training department approximately 120 days prior to the examination outlining examination security expectations, listing the materials required by the NRC to conduct the examination, reconfirming the examination dates, and reconfirming the number of candidates you have in the training program. If you have any questions concerning this information, please contact Mr. David L. Pelton of my staff at 630-829-9732.

MLD/0940619

In accordance with 10 CFR 2.790 of the NRC's "Rules of Practice," a copy of this letter will be available electronically for public inspection in the NRC Public Document Room or from the Publicly Available Records (PARS) component of NRC's document system (ADAMS). ADAMS is accessible from the NRC Web site at <http://www.nrc.gov/NRC/ADAMS/index.html> (the Public Electronic Reading Room).

Sincerely,

David E. Hills, Chief

Ladies/Gentlemen:

DOCKETS 50-266 AND 50-301
RESPONSE TO REGULATORY ISSUE SUMMARY 2000-14
POINT BEACH NUCLEAR PLANT, UNITS 1 AND 2

Regulatory Issue Summary (RIS) 2000-14, "Preparation and Scheduling of Operator Licensing Examinations," was issued on September 6, 2000. The RIS asked that within 30 days licensees voluntarily submit scheduler information concerning generic fundamentals examinations through CY 2002 and initial operator license examinations through CY 2004.

Attached is a completed NRC Form 536 that provides the requested information for Point Beach Nuclear Plant, Units 1 and 2

Sincerely,

Dan Cole

801 Warrenville Road
Lisle, IL 60532-4351

Dear Mr. Hills:

POINT BEACH NUCLEAR PLANT
REQUEST FOR NRC PREPARATION OF
OPERATOR LICENSING EXAMINATIONS

In update to our response to NRC Administrative Letter 99-03, the following proposed initial operator licensing examinations and schedules for 2002 and 2003:

	<u>2002</u>	<u>2003</u>
Number of Reactor Operator Applicants	6	4
Number of Senior Operator Applicants	3	3
Number of Senior Operator Upgrade Applicants	3	1

We propose that the 2002 examinations be administered in January, while the 2003 examinations would be administered in May.

We would appreciate the NRC preparing these examinations. We understand, however, that because of resource constraints you may not be able to accommodate this request. Please notify us if you are unable to prepare the examinations or if there is a conflict with the proposed examination dates.

Sincerely,

A. J. Cayia
Manager,
Regulatory Services & Licensing
